Overview

Currently (5am EDT): Ongoing cluster of strong to severe thunderstorms will continue to persist through the early morning hours, tracking to the southeast as they move through central Kentucky. As this cluster becomes more organized, they could take a more southerly turn, putting much of south-central Kentucky at risk.

Today: Severe weather threat will continue throughout the day with all of central Kentucky and south-central Indiana having the potential to be impacted. However, the focus for the greatest threat will be in eastern Kentucky and possibly portions of southern Kentucky.
